

Where in the world are all the orangutans?

Print out the attached sheet (laminates if possible) and use under a classroom globe.

See if kids can find Borneo and Sumatra. You can give the hint: It's on the equator.

Provide a magnifying glass (attach a string to it and the globe).

Ask, "Can you see the orangutans?"

When they say, "No", you can say, "See, that is the problem!"

Where in
the world
