

You can find other ways of making your product.

We can't find other ways of making orangutans!

Please stop sourcing unsustainable palm oil to make your products.

When you buy cheap unsustainable palm oil you are:

- supporting the logging of some of the world's most ecologically important forest.
- promoting illegal forest fires that contribute significantly to climate change.
- destroying the last remaining habitat for many critically endangered species, including the orangutan which is facing extinction.

You have an opportunity and responsibility to show leadership in palm oil procurement. I am asking that you:

- replace palm oil with alternative oils where possible.
- buy only certified palm oil that protects forests, preserves livelihoods and safeguards wildlife.
